## ABOUT ME

---

Passionate developer with over two and a half years of specialized experience in Node.js, proficient in both Javascript and Typescript. Solid skills in MongoDB, Kafka, NewRelic, AWS, GraphQL, and SonarQube. Committed to creating efficient and scalable solutions, providing exceptional user experiences. Well-versed in Agile methodologies.

## SKILLS

---

- Programming Languages: Node.js (Javascript, Typescript)
- Databases: MongoDB
- Messaging Tools: Kafka
- Monitoring: NewRelic
- Cloud Computing: AWS
- Data Query and Manipulation: GraphQL
- Static Code Analysis: SonarQube
- Agile Methodologies: Scrum, Kanban

## LANGUAGES

---

- **Portuguese:** Fluent
- **English:** Mid level

## CAREER

---

### Software Engineer | VOLL (02/16/2022) - Actually

- Led the development and implementation of Node.js applications using both Javascript and Typescript.
- Effectively integrated systems using Kafka, ensuring asynchronous communication and high availability.
- Optimized queries and operations in MongoDB, contributing to improved performance and scalability.
- Utilized AWS for infrastructure implementation, maintenance, and scalability.
- Embraced Agile methodologies for iterative development, fostering collaboration and adaptability.

## EDUCATION

---

- **Technologist in system analysis and development | Unifacig** - 01/01/2019 - 12/20/2021
- **Postgraduate degree in software engineering | PUC Minas** - 06/01/2023 - 06/01/2024

## COURSES AND JOBS

---

- **Courses:**
  - Node.js Developer (Udemy)
  - SQL Databases (Udemy)
  - GitFlow (Udemy)
  - GraphQL (Udemy)
  - Reactive JavaScript (Udemy)
- **Jobs:**
  - Managment System of mechanical workshops.
  - VOLL App (corporate mobility).
